

DICKSA ANANDA CRISTIAN TUE

Full-Stack Engineer | AI-Powered Web Developer

Building scalable SaaS platforms, REST APIs, and modern AI-assisted applications

+6281337586563 | diksaanandaa@gmail.com | linkedin.com/in/dicksa | github.com/ArsPerpetua

PROFESSIONAL SUMMARY

Full-Stack Engineer with hands-on experience building scalable web applications, REST APIs, AI-powered systems, and business workflow platforms for government and private clients. Experienced in Python (Django/FastAPI), React.js, TypeScript, Express.js, PostgreSQL, and MySQL, with practical deployment experience using Railway and Vercel. Currently building a B2B SaaS platform called "DocuFlow" a Document Workflow & Smart Prioritization System using Vite (React + TypeScript + SWC), Tailwind CSS, and React Router v6. Passionate about backend engineering, SaaS architecture, AI-assisted development workflows, and solving real-world business problems through scalable software systems.

CORE SKILLS

- Full-Stack Development, REST API, API Integration, System Architecture
- Frontend: React.js, TypeScript, JavaScript, Tailwind CSS, HTML, CSS
- Backend: Python (Django, FastAPI), Express.js, PHP (Laravel, CodeIgniter)
- Database: PostgreSQL, MySQL
- Deployment & Infrastructure: Railway, Vercel, GitHub, Docker (Basic)
- AI-Assisted Development: ChatGPT, Claude, Cursor AI, GitHub Copilot
- Software Engineering, Database Design, SDLC

EDUCATION

Universitas Bumigora (Mataram)

2021 – 2025

- Degree: Bachelor of Computer Science (S.Kom)
- GPA: 3.94 / 4.00 (Top 1 Graduate)

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer & AI Engineer

Jan 2024 – Present

- Developed and deployed production-ready web applications for government and private clients
- Built scalable REST APIs, authentication systems, and workflow automation platforms
- Designed and optimized relational databases using PostgreSQL and MySQL
- Developed AI-powered applications and decision support systems for real-world use cases
- Integrated deployment workflows using Railway and Vercel
- Built modern frontend systems using React.js and TypeScript
- Delivered end-to-end software solutions from requirement analysis to production deployment

Pranata Komputer (Maganghub Program) – Kemenkum NTB

Dec 2025 – Jun 2026

- Selected for a 6-month government internship program through Maganghub
- Developed IT Ticketing System to improve internal issue tracking and response efficiency
- Automated reporting workflows, reducing manual processes
- Translated user requirements into scalable and functional system features

Project Manager & AI Developer – DBS Coding Camp

Feb 2025 – Jul 2025

- Led development of an AI-based application in a cross-functional team
- Built and integrated machine learning models into a production-ready system
- Managed project workflow and team coordination
- Achieved Top 10% Distinction among 3,000+ participants

KEY PROJECTS

DocuFlow — B2B SaaS Document Workflow System (Ongoing)

- Building a B2B SaaS platform focused on document workflow management and smart prioritization
- Developed using Vite (React + TypeScript + SWC), Tailwind CSS, and React Router v6
- Implemented modular frontend architecture, role-based dashboard systems, and workflow management features
- Currently developing toast notification system and scalable UI feedback architecture
- Focused on modern SaaS development patterns and scalable frontend engineering

IT Ticketing System – Kemenkum NTB

<https://oke-ntb.kemenkumham.go.id/laporit/>

- Developed full-stack web system to streamline IT issue reporting and tracking
- Improved workflow efficiency and reduced manual handling processes
- Built backend logic, database design, and user interface

Influencer Agency Platform (Django + Railway)

<https://web-production-7525e.up.railway.app/>

- Built and deployed full-stack web application using Django and Railway
- Implemented authentication, data management, and scalable backend system
- Designed system to support real-world business workflow

Decision Support System – E-Commerce Selection (Streamlit)

<https://spk-ecommerce-wiwin.streamlit.app/>

- Developed decision support system using AHP and SAW methods
- Built interactive interface using Streamlit
- Automated ranking and recommendation process

EcoVision – AI-Based Trash Classification App

<https://ecovision-beta.vercel.app/>

- Developed AI-powered system for real-time waste classification
- Implemented machine learning model for environmental use cases
- Designed user-friendly interface for practical deployment

LENERA – Financial Service Portal (KPPN Mataram)

<https://lenteraverakppnmataram-tech.github.io/lentera-website/>

- Built web-based portal to streamline financial service workflows
- Improved efficiency of reporting and service processes
- Developed using Laravel & structured database design

Decision Support System – Student Ranking

<https://github.com/ArsPerpetua/spk-siswa-berprestasi>

- Developed ranking system using AHP, MOORA, and ARAS methods
- Automated decision-making process for performance evaluation
- Applied data-driven approach for objective assessment

SOFT SKILLS & LANGUAGES

- Skills: Analytical Thinking, Cross-Functional Teamwork, Problem-Solving, Strategic Communication.
- Languages: Indonesian (Native), English (Professional Working Proficiency).

ACHIEVEMENTS

- Best Graduate (Rank 1 – Computer Science)
- International Research Presenter – ICORIS 2025
- Top 10% Graduate – DBS Coding Camp

AI & DEVELOPMENT TOOLS

- AI Development Workflow: ChatGPT, Claude, Cursor AI, GitHub Copilot
- Version Control: Git & GitHub

- Deployment Platforms: Railway, Vercel
- Currently Learning: Next.js, CI/CD, Docker, SaaS System Design
